Summary of Pertinent Data

Item	Administrative Year 2018 - 2019	Administrative Year 2019 - 2020
Parties	148	149
Rights Holders	126	127
Active pumpers	73	70
Active non-parties	0	0
Allowed pumping allocation (acre-feet)	217,367	217,367
Water put into storage	6,457.15	16,923.31
Rainfall (inches)	19.01	13.69
Injection at the Alamitos Barrier project (acre-feet) ¹	3,301	3,442
Spreading operations (acre-feet) ²	134,801	83,660
Watermaster expenses, per APA	\$1.76	\$1.71
Watermaster expenses, total ³	\$383,635	\$372,766
APA Extractions (acre-feet) ⁴	180,382	173,033
Storage Extractions (acre-feet)	4,656.47	3,665.77
Recycled water use by entities (acre-feet)	10,366	10,632
Imported water use by entities (acre-feet) ⁵	103,649	118,168
Exported water use by parties (acre-feet)	1,481	1,122
Total water use by parties (acre-feet)⁶	297,572	304,377

¹ Includes injection only on the Los Angeles County portion of the Alamitos Barrier.

² Provisional information from Los Angeles County Department of Public Works.

³ For the 2019-2020 AY, Water Rights Panel \$173,893.61, Administrative Body \$198,872.57.

⁴ Excludes extractions by parties with non-consumptive water use permits and by non-parties.

⁵ Includes groundwater imported from the San Gabriel Basin.

⁶ Excludes exported water use by parties.

Introduction

A. Executive Summary

This 2019-2020 Watermaster Report, developed by the Administrative Body and adopted by the Water Rights Panel, provides information on groundwater extractions, storage accounts, use of imported water and recycled water, replenishment operations, and the budget and finances of the Central Basin (Basin) Watermaster during the 2019-2020 administrative year (AY). This report complies with the provisions set forth in the Central Basin Third Amended Judgment (Judgment).

During the 2019-2020 AY, the Basin experienced a decrease in groundwater extractions; contributing factors include the coronavirus pandemic that created a stay-at-home order for residents and closed non-essential businesses starting in mid-March 2020, the shutdown of production wells due to concerns of potential PFAS contamination, and the substantial late-season rainfall in March and April 2020. Yet, a noticeable highlight in the Basin includes the 16,923.31 acre-feet (Af) of water put into storage for 2019-2020 AY, which is a 162% increase from the previous AY. Also, the Court granted a stipulation in intervention to OU2 Environmental Remediation Trust, which makes them a new Party to the Judgment. Furthermore, zero imported water was purchased by the Water Replenishment District of Southern California (WRD) for groundwater replenishment, due to its completion of the Albert Robles Center for Water Recycling and Environmental Learning (ARC), which replaced the imported water with advanced treated recycled water for groundwater replenishment.

The report is organized by three sections, including Water Use, Water Supply, and Watermaster Costs and Budget. In addition, the report provides various tables and figures describing the narrated information. Lastly, for the first time, this annual report has a new appendix the "Erratum of the Central Basin Watermaster Annual Report for July 1, 2018- June 30, 2019," which provides a list of corrected errors to the previous annual report (Appendix D).

B. Background

The Central Basin Watermaster Service Area overlies approximately 227 square miles of the Basin in southeastern Los Angeles County. Figure 1 shows the location and boundaries of the Central Basin Watermaster Service Area (adjudicated boundary). The Watermaster Service Area is bounded by the Newport-Inglewood Uplift on the southwest, the Los Angeles-Orange County line on the southeast, and an irregular line that approximately follows Stocker Street, Martin Luther King Boulevard, Alameda Street, Olympic Boulevard, the boundary between the City of Los Angeles and unincorporated East Los Angeles, and the foot of the Merced Hills and Puente Hills on the north. Twenty-three incorporated cities and several unincorporated communities lie within the Watermaster Service Area. Groundwater from the Basin provides a substantial portion of the water supply needed by the residents, businesses, and industries in the area overlying the Basin.

More than 60 years ago, groundwater overdraft and declining water levels in the Basin threatened the area's groundwater supply and caused the intrusion of seawater into the aquifers in the southern part of the Basin. However, timely legal action, adjudication of the water rights, and the creation of WRD halted the overdraft and prevented further damage to the Basin. Since that time, groundwater extraction from the Basin has been limited to the amounts set by a Superior Court Judgment and monitored by a Court-appointed Watermaster.

The first Judgment was finalized and signed in 1965 and it appointed the Department of Water Resources (DWR) as the Watermaster. Since its inception, the Judgment has been amended three times. The Judgment was first amended in 1980 to provide for a transition in the administrative year from a water year (October 1 to September 30) to a fiscal year (July 1 to June 30). The Judgment was amended for the second time in 1985 to modify the annual budget (\$20 minimum assessment) and exchange pool provisions. In addition, the second amendment modified carryover and overproduction provisions, defined carryover, and provided for exemptions for extractors of contaminated groundwater. The Third Amended Judgment was finalized on December 23, 2013. For the first time, the Court allowed Parties to have direct input into how the Judgment is administered and enforced. The Judgment confirmed the retirement of DWR as the Watermaster and created three separate bodies that assist the Court in the administration and enforcement of the provisions of the Judgment.

The first body is the Administrative Body, which administers the Watermaster accounting and reporting functions. The WRD was appointed by the Court to fulfill this role.

The second body is the Water Rights Panel, which enforces issues related to the pumping rights within the adjudication. The Water Rights Panel is made up of seven water rights holders who are elected by other rights holders in the Central Basin. Members of the Water Rights Panel during the 2019-2020 AY included the City of Downey, Golden State Water Company, City of Lakewood, City of Long Beach, Orchard Dale Water District, City of Signal Hill and City of Paramount.

The third body is the Storage Panel, which is comprised of the Water Rights Panel and the WRD Board of Directors; together they review and approve certain groundwater storage efforts.

Water Use

A. Allowed Pumping Allocation Extractions by Parties

The Judgment limits the amount of groundwater each Party to the Judgment may extract annually from the Basin. This amount is known as the Party's Allowed Pumping Allocation, or "APA". The APA for each Party is listed in Table 1. Parties are required to report groundwater extractions to the Administrative Body each month (or quarterly for smaller producers). Appendix A lists, by Party, the volume of groundwater extracted each month from each active well in the Basin. Figure 1 describes the variation of groundwater production by three distinct production classifications: less than 500 acre-feet per year (afy), 500 to 2,000 afy, and more than 2,000 afy, during the 2019-2020 AY. In addition, Figure 2 illustrates the monthly water production (excluding non-consumptive use) for the 2019-2020 AY, which totaled 173,033.53 af, which is a 4% decrease from the previous AY.

To provide flexibility with regard to groundwater extractions, the Judgment contains provisions, such as the "One Year Carryover" (also known as "Normal Carryover"), which allows each Party to carry over into the succeeding administrative year a portion of its unused APA. Specifically, Parties are allowed to carryover unused rights up to the greater of:

- 60% of their APA plus or minus any leases with flex or 20 af, whichever is more, less the amount of water in a Party's storage account; or
- 20% of a Party's APA

This type of provision is necessary to meet unforeseen water demand. In addition, any unused Exchange Pool water, discussed in Section (H), is carried over into the following AY.

B. Storage Transactions

The Judgment allows Parties with water rights to store water in the Basin for later extraction. Pursuant to Section III.A.(2) of the Judgment, Parties have the ability to convert their normal carryover to storage upon payment of the Replenishment Assessment to WRD.

Table 2 describes storage accounting, including total carryover from the 2018-2019 AY, storage activity for the 2019-2020 AY (transfers, water put into storage, and water extracted from storage) and the total balance carryover into the ensuing AY. Table 3 lists quantities of water that were put into storage by each Party during the 2019-2020 AY. The total amount of water that was put into storage is 16,923.31 af, which is a 162% increase in comparison to the previous AY. In addition, a total of 3,665.77 af was extracted from storage by three different Parties, which are listed in Table 4. This is a 21% decrease in storage extractions when compared to the previous AY.

The Judgment also provides for the transfer of stored water between Parties. However, there were no transfers of stored water during the 2019-2020 AY (Table 5).

Table 6 provides a historical storage summary from the 2013-2014 AY to the 2019-2020 AY, for water put into storage, water extracted from storage, storage balance, and the available adjudicated storage capacity.

C. Regional Disadvantaged Communities Incentive Program

Section II.H. of the Judgment contains provisions for the development of a Regional Disadvantaged Communities Incentive Program (RDCIP) that allocates 23,000 af of storage space for the use or benefit of Disadvantaged Communities (DAC) within the Central Basin. A DAC is defined as any area that is served by a water purveyor and consisting of one or more contiguous census tracts, which based upon the most recent U.S. Census data, demonstrates a median household income which is less than eighty percent (80%) of the median household income for all Census Tracts within the State of California. This program was developed by the Water Rights Panel during the 2014-2015 AY and approved by the Court in June 2015.

There were no requests for participation in the RDCIP in the 2019-2020 AY.

D. Annual Extraction Limit and Over-extraction Rights

The total extraction right for each Party includes a Party's APA, leases, stored water, carryover water, or other contracted right as provided in the Judgment, but there may be a limit as to how much water the Party can extract.

No Party with normal carryover and/or storage rights is allowed to extract in excess of 140% of the sum of their APA +/- leased water, except upon prior approval by the Water Rights Panel. For example, if a Party has an APA of 1,000 af, 800 af of stored water rights, and leases an additional 200 af (for a total extraction right of 2,000 af), their maximum yearly extraction would be calculated as follows: $(1,000 + 200) \times 1.4 = 1,680$ af. Conversely, if the Party leased out 200 af, their maximum yearly extraction would be $(1,000 - 200) \times 1.4 = 1,120$ af. Any Party with carryover and/or storage that extracts more than 140% of their annual extraction limit without prior approval from the Water Rights Panel is in violation of the Judgment. Any extraction beyond a Party's total extraction right is deducted from that Party's subsequent AY APA.

Parties with neither normal carryover nor storage rights can over-extract 20% of their APA +/- leased water or 20 af, whichever is greater. Any extraction beyond a Party's total extraction right is deducted from the subsequent AY.

When a Party over-extracts, the over-extraction must be reconciled in the following AY unless Watermaster concludes that making up the over-extraction would create an unreasonable hardship

for the Party. In such cases, Watermaster may adjust the requirement. For example, Watermaster may prorate the reduction in the Party's APA over a period of up to five years.

During the 2019-2020 AY, seven Parties had a combined cumulative over-extraction of 24,619.04 af, the majority consisting of historic over-extraction by one party. Two Parties over-extracted within the provisions of the Judgment and five Parties were in violation of the Judgment. Table 7 lists over-extractions by all Parties.

E. Extractions by Non-Parties

In the 2019-2020 AY there were no extractions by non-parties reported (Table 8).

F. Extractions of Contaminated Groundwater

A Party who is a water rights holder may petition WRD for a Non-Consumptive Water Use Permit (NCWUP) as part of a project to remediate or ameliorate groundwater contamination. If the petition is granted, the Party may extract the groundwater without counting against its production rights, so long as conditions of the Judgment are met. A non-Party may extract contaminated groundwater for cleanup purposes by partnering with a Party who obtains the NCWUP and then assigns it to the non-Party.

Table 9 lists current NCWUPs issued by WRD and the amounts of groundwater extracted under those permits. In the 2019-2020 AY there were 92.19 af of NCWUP extractions via six permits, which is a 8% extraction decrease from the previous AY. Appendix A reports these extractions by well and month.

G. Allowed Pumping Allocation Transfers

Each year, APAs are transferred between Parties through leases (temporary transfers) and change of ownership (permanent transfers) transactions. Table 10 shows transfers of APAs through leases, specifically the parties involved, transaction type, amount, and recordation date. During the 2019-2020 AY there were 49 leases that totaled 31,003.51 af (43 leases with flex and 6 leases without flex). Leases with flex transfers both the pumping right and associated carryover rights to the lessee for the term stated within the lease agreement.

In transferring water rights, Parties must specify (1) the type of right (i.e., APA, normal carryover, or drought carryover), (2) the amount of right to the nearest 0.01 af, and (3) the period of the lease, if applicable. Moreover, all leases must be made on an administrative year basis and must be executed by the Parties and received by Watermaster no later than one month and 15 days following the end of the AY in which the lease is effective.

Table 11 shows permanent transfers of APA and carryover. There were two permanent transfers (sales) of APA that totaled 306.97 af and four carryover transfers (two Normal Carryover [NCO], one Drought Carryover-77[DCO77], and one Drought Carryover-91[DCO91]) totaling 212.35 af.

The transfer of water rights must be documented accordingly. For example, when land is sold on which a water right has been developed, the Watermaster must receive a copy of the transfer document if the water right is also transferred. The water right does not automatically pass to the new land owner unless the transfer document specifies that the water right was transferred with the land. For the proper accounting of the water right, the transfer document must specify (1) the type of right (i.e., APA, normal carryover, drought carryover, or stored water) and (2) the exact amount of water right (s) transferred. Watermaster provides a template for a Deed of Water Rights – Permanent Transfer transaction on its website to ensure the information provided on the transfer document is sufficient.

There were 149 Parties and 127 Rights Holders in the 2019-2020 AY, which is an increase of one Party and Rights Holder from the previous AY. The Court granted a stipulation in intervention to OU2 Environmental Remediation Trust on June 17, 2020 and they became a Party to the Judgment. Appendix B shows the succession of each Parties APA in the Basin and current Parties to the Judgment are listed in Appendix C.

H. Exchange Pool

The Judgment authorizes an Exchange Pool to provide additional water rights to Parties without sufficient water. If a Party's estimated water requirement for the following AY exceeds its total available water supply, that Party may purchase additional water from the Exchange Pool. Any Party wishing to purchase water from the Exchange Pool must file a request with the Watermaster before April 1. If no requests are received by April 1, the Exchange Pool will not operate in the following AY, and Watermaster will not process Exchange Pool forms. There were no requests for Exchange Pool water during the 2019-2020 AY (Table 12).

I. Status of Extraction Wells

In the Basin there were 351 wells that reported extraction during the 2019-2020 AY, which is 12 less wells than the previous AY. The locations of the wells and their relative amount pumped are shown in Figure 1. There were no new extraction wells reported completed (Table 13) and there was one extraction well reported destroyed (Table 14) in the 2019-2020 AY.

J. Meter Testing Program

Accurate measurement of groundwater extractions is essential for the successful management of groundwater in the Basin. Therefore, Watermaster requires an operative water meter to be installed at each extraction well. It is the responsibility of each Party to ensure that its meter and test facilities are installed properly and are maintained in good working condition. It is the goal of Watermaster to test the water meter at each active extraction well at least once every two years or when a Party requests a meter calibration. Watermaster tests meters by volumetric or pitot tube comparisons or other methods as appropriate. Watermaster notifies a Party that it must repair or replace its meter when the meter registers beyond five percent accuracy. If the registration accuracy of the meter deviates by as much as five percent or more, Watermaster may revise the well production amount.

The meter testing program is managed by the Water Rights Panel who has contracted with DWR. During the 2019-2020 AY, the DWR visited 49 Parties and performed 206 tests. Tests showed that four meters were inconclusive and 16 meters did not pass, which means the meters were either more than five percent fast or slow. Please contact the Water Rights Panel at www.cbwatermaster.org, for specific information regarding meter testing.

Water Supply

A. Precipitation

Precipitation over the Basin has relatively minimal direct influence on the replenishment of the groundwater in the Basin. This is a result of the low soil permeability that characterizes the primary water-producing aquifers throughout much of the Basin and largely impermeable surfaces (i.e., pavement and buildings) covering most of the forebay areas. However, during years of high rainfall, increased runoff from the areas upstream of the Basin can result in increased replenishment to the Basin and decreased groundwater demand by the water users, which in turn can result in lower rates of groundwater extraction from the Basin.

During the 2019-2020 AY, the following amounts of precipitation were measured at five precipitation stations located throughout the Central Basin region:

- 11.42 inches at Los Angeles-RD241 (formerly 96th and Central)
- 16.21 inches at Montana Ranch
- 14.85 inches at University of Southern California
- 11.96 inches at La Mirada Station
- 14.00 inches at Imperial Yard

Figure 3 shows the locations of these precipitation stations, and Figure 4 shows the monthly average of the rainfall measured at these stations. Based on the total rainfall measured at these stations, the mean precipitation over the Central Basin was 13.69 inches, which is 105% of the running 5-year mean of 13.10 inches. Although the region received average rainfall, the mean precipitation for 2019-2020 AY compared to the previous AY decreased by 5.32 inches.

B. Groundwater Recharge

Natural replenishment of the groundwater in the Basin occurs largely from surface flow and underflow through Whittier Narrows from the San Gabriel Valley. As mentioned above, minimal rainfall over the Basin would infiltrate into deeper aquifers of the Basin.

Intentional replenishment of groundwater in the Basin is accomplished by capturing and spreading river water at the Rio Hondo and the San Gabriel River Coastal Spreading Grounds in the Montebello Forebay (Figure 3). The sources of this replenishment water include local storm runoff, local dry weather urban runoff, imported water purchased from the Metropolitan Water District of Southern California (MWD), and recycled water purchased from Los Angeles County Sanitation Districts. There was a decrease of 57% in "local runoff" when compared to the previous AY, which is credited to the average rainfall received compared to the previous wet year. Table 15 shows the

sources and quantities of water spread to replenish the groundwater for the 2018-2019 AY and 2019-2020 AY. Specifically, WRD purchased zero af of imported water for spreading, which is 5,340 af less than the previous AY. In addition, WRD purchased 48,213 af of recycled water for spreading, which is 283 af or 0.59% more than the previous AY. The completion of the ARC facility has allowed WRD to replace imported water with advanced treated recycled water for groundwater recharge in the Montebello Forebay.

C. In-Lieu Recharge

During the 1965-1966 water year, WRD, in cooperation with the MWD, began an in-lieu replenishment program, where discounted imported water was offered seasonally due to availability. WRD has contracted with producers having access to supplemental imported water that could be used in lieu of extracting groundwater from the Basin to reduce overall pumping impacts. Due to water shortages and other reasons, MWD discontinued their discounted seasonal imported water in 2011 and as a result, WRD had suspended its in-lieu program except under special circumstances. During the 2019-2020 AY WRD offered the program to the City of Long Beach to promote groundwater replenishment. The City of Long Beach retired 5,000 af of pumping rights for the 2019-2020 AY and took 5,000 af of imported water instead under this program (Table 16). The use of supplemental water in-lieu of pumping groundwater does not change a party's water rights, but it counts as water pumped under the Judgment.

D. Imported Water

Water is imported from northern California via the State Water Project and the Colorado River, and is made available to water users by MWD through its member agencies: Central Basin Municipal Water District (CBMWD) and the Cities of Compton, Long Beach, and Los Angeles. The City of Los Angeles also imports water from the Owens River-Mono Basin. Furthermore, the California Domestic Water Company, the San Gabriel Valley Water Company, Suburban Water Systems, and the City of Whittier import groundwater from the San Gabriel Valley groundwater basin, which lies to the northeast and upstream of the Basin. In the 2019-2020 AY, a total of 118,168 af of water was imported, for potable use, to the area overlying the Central Basin. Table 17 lists imported water use by source of water, Party, and quantity, not including WRD replenishment water.

E. Recycled Water

Table 18 shows that 10,632 af of recycled water for direct use in the area overlying the Central Basin during the 2019-2020 AY, not including WRD replenishment water. This amount is 266 af or 3% more than was used in the 2018-2019 AY.

F. Total Water Use

Figure 5 shows the total water use in the Basin during the 2019-2020 AY, including extracted groundwater, imported water, and recycled water for direct use.

G. Exported Water

California-American Water Company exported 1,122 acre-feet of groundwater from the Basin to its service area that overlies a portion of the West Coast Basin.

H. Increased Extraction in the Basin for Certain Purveyors Serving Overlying Communities

Per Section IV.K of the Judgment, “certain purveyors” are Parties to both the Central Basin Third Amended Judgment and the West Coast Basin Judgment and serve communities overlying both the Central and West Coast Basins. These purveyors, include the City of Los Angeles, Golden State Water Company, and California Water Service Company and are allowed to increase their extraction in the Central Basin beyond their APA. However, the increased extraction, which is limited to 5,000 af per AY, is counted against their Adjudicated Right (AR) in the West Coast Basin.

In the 2019-2020 AY Golden State Water Company increased their extraction in the Central Basin by 3,000 af by deducting this amount from their unused West Coast Basin Rights, which is reflected in Table 1 (see footnote 5).

I. Alamitos Gap Barrier Project

Seawater intrusion in the Alamitos Gap near the mouth of the San Gabriel River poses a threat to the groundwater in the Basin. The Alamitos Gap Seawater Barrier Project is designed to prevent seawater intrusion into the fresh water aquifers of the Basin. The location of the barrier is shown on Figure 3, and is situated both in the Basin and in Orange County.

The Los Angeles County Department of Public Works operates the barrier project, which is comprised of 60 injection wells that create a groundwater pressure ridge to halt seawater intrusion. The project includes 220 observation wells that are used to monitor groundwater levels and quality in the area. Table 19 shows the quantities of imported and recycled water injected into the Los Angeles County side of the barrier wells in the 2018-2019 and 2019-2020 AY. There was a decrease of 307.2 af or 10% in imported water use and an increase of 448.1 af or 616% in recycled water use for injection. The seawater intrusion problem is contained by the Barrier Project.

J. Groundwater Levels

Figure 3 shows the locations of selected wells that are used to monitor groundwater level elevations in the Basin. Figure 6 shows the water level elevations in key wells located in the Montebello Forebay, and Figure 7 shows the water level elevations in wells perforated in Principal Aquifers of the Basin. WRD’s annual Engineering Survey and Report and Regional Groundwater Monitoring Report provides more information on groundwater levels. These reports are available on WRD’s website.

Watermaster Costs and Budget

To fund Watermaster activities, both the Administrative Body and the Water Rights Panel have annual assessments that are levied on water rights holders under the terms of the Judgment. The Administrative Body assessment is only charged to those rights holders that have extracted from the Central Basin within the current or past two administrative years (active groundwater producers). The assessment is a flat fee of twenty dollars (\$20) for each active rights holder plus a proportion of the remaining Administrative Body budget based on the APA of the active rights holder. The separate Water Rights Panel assessment is charged to all water rights holders, not just active rights holders, based on their APA.

For 2019-2020 AY, the Watermaster budget for the Administrative Body was \$198,872.57, which is unchanged from the previous AY. The Watermaster budget for the Water Rights Panel was \$173,893.61 which is a \$10,868 decrease from the previous year. The decrease is attributed to a decrease in the Water Rights Panel annual assessment from \$0.85 to \$0.80 per af. The overall Watermaster budget total was \$372,766.18. Table 20 lists the budget summary of the 2019-2020 AY.

This page was left intentionally blank.

Table 1 - Water Rights Accounting (acre-feet)

Party	APA 2019-2020 ¹	Net Carryover ² from 2018-2019	Leases ³		Storage ⁴	Increased Extractions ⁵	Total Rights ⁶	Amount Pumped	Balance ⁷	Allowable carryover into 2020-2021				Total

¹ APA - Allowed Pumping Allocation.

² Net Carryover is the sum of all carryover from the previous year less the amount of carryover conversion for the current year.

³ See Table 10 for information concerning leases. Lease with flex includes carryover provisions.

⁴ Storage includes Carryover Conversion for Administrative Year 2019-20.

⁵ Increased Extraction: Section IV(K) of the Central Basin Judgment permits increased extraction rights through use of up to 5,000 AF of certain parties' West Basin Rights in the Central Basin

The aforementioned parties include City of Los Angeles, Golden State Water Company, and California Water Service Company.

⁶ Total Rights = Allowed Pumping Allocation + Net Carryover + Leases + Storage + Increased Extractions, but does not necessarily equal Annual Extraction Limit (see page 5, section D).

⁷ Balance = Total Rights - Amount Pumped.

⁸ DCO 77 - drought carryover created in 1977.

⁹ DCO 91 - drought carryover created in 1991.

¹⁰ 2018-19 net carryover reduced by carryover conversion into storage for 2019-2020

Downey, City of: 2,000.00 AF; Lakewood, City of: 4,528.89 AF; Long Beach, City of: 6,434.35 AF; LADWP: 3,447.00 AF;

San Gabriel Valley Water Company: 513.07 AF

¹¹ Balance accounts for 5,000 a.f. of deducted In-Lieu Production.

¹² Negative Normal Carryover will be deducted from the subsequent year's APA.

¹³ The court granted a stipulation in intervention to OU2 Environmental Remediation Trust on June 17, 2020 and they became a party to the Judgment. See Table 11 for details.

Total					24,619.04		

¹ Overextraction = Amount Pumped - Allowable Extraction; any over-extraction will be deducted from the following year.

² If the Party has carryover or stored water, they are allowed to over-extract up to 140% of APA +/- leases and not be in violation of the Judgment; if they do not have carryover and/or stored water, they are allowed to over-extract 20% or 20 af of APA +/- leases, whichever is greater.

³ Includes over-extraction from previous AYs by Caltrans for dewatering under the 105 Freeway.

Table 8. Extractions by Non-Parties

Non-party	Amount Pumped (acre-feet)
There were no extractions by non-parties in 2019-2020	
0.00	

Table 9 - Non-Consumptive Water Use Permits

Party	WRD Res. No.	Description	2019-2020 Extraction ¹
Ashland Chemical Company (on behalf of the City of Sante Fe Springs)	13-962	Allowed to extract 15.00 acre-feet of water per year during the period beginning July 1, 2016 and ending on June 30, 2021.	-0.79
Boeing Company (on behalf of the City of Long Beach)	17-1065	Allowed to extract 153.00 acre-feet of water per year for the period from November 16, 2017 through November 30, 2022.	78.47
Defense Logistic Agency Energy (on behalf of the City of Norwalk)	14-978	Allowed to extract 28.00 acre-feet of water per year for the period from February 3, 2019 through February 2, 2024.	2.51
Demunno/Kerdoon (on behalf of the City of Compton)	13-952	Allowed to extract 25.00 acre-feet of water per year for the period of July 17, 2013 through July 16, 2018.	3.70
Omega Chemical (on behalf of Northrop Grumman Corporation)	17-1063	Allowed to extract 43.00 acre-feet of water per year for the period from October 1, 2017 through September 30, 2022.	4.58
SFPP L.P. (on behalf of the City of Norwalk)	14-977	Allowed to extract 80.00 acre-feet of water per year for the period from February 3, 2019 through February 2, 2024.	3.72
Total			92.19

¹ Negative numbers indicate net re-injection of treated water.
