# FOREWORD

The Department of Water Resources, as Watermaster, is pleased to submit this report on water use and water supply conditions in the Central Basin during the 2011-2012 fiscal year. The report is prepared annually in accordance with the provisions of the Los Angeles County Superior Court Judgment in the Central Basin. The Judgment, together with Part 4, Division 2 of the California Water Code, authorizes this publication and the Department's administration of the Watermaster Service Area.

In 2011-2012, the parties pumped 185,914 acre-feet of their 241,272 acre-feet of allowable extraction and kept 21,722 acre-feet as carryover. Parties with non-consumptive water use permits pumped 105.69 acre-feet.

This report includes information on groundwater extractions, use of imported water and recycled water, replenishment operations, administration of the Water Exchange Pool, and the budget and finances of Watermaster Service during the 2011-2012 fiscal year. The first part of the report is a discussion of the water conditions in the Central Basin, the second part is the tables, and the third part is the figures.

The Watermaster appreciates the assistance and support received from the many public and private organizations and individuals whose contributions were essential to this report. The success of Watermaster Service is dependent on continued cooperation and communication between the Watermaster and the water users.

I want to pay tribute to Milan Cernosek, who, before his untimely death on August 1, 2012, was the Chief of the Watermaster Section and a Deputy Watermaster. This report is dedicated to his memory.

Mark Stuart, Chief Southern Region and Watermaster

# NOTES

The Water Replenishment District of Southern California declared a water emergency on November 19, 2010, potentially triggering additional or changed rights under the Judgment. The declaration has been challenged by various parties in a court proceeding. Los Angeles Superior Court Judge Holly E. Kendig stayed implementation of the declared water emergency and the challenge, pending the outcome of other court proceedings. Thus, this report does not make any allocation of water rights that might be available under the declaration. The Watermaster may supplement this report in the future.

The Judgment imposes certain limits on extraction of water from the Central Basin. Parties might from time to time claim that they have imported and stored water in the Basin, or that they have the right to import or extract stored water, or that the Court's jurisdiction should be exercised to manage groundwater storage under the Judgment. There is pending litigation concerning such issues. As it has done historically, the Watermaster will report the total amount of water extracted by a party and the amount of that party's extraction that the Watermaster concludes is allowed under the Judgment (subject to prior Order with regard to any "Declared Water Emergency"). The Watermaster will also note the extracted amount each party claims is from imported water. Where the Watermaster concludes that the amount extracted exceeds the allowed extraction, the Watermaster reports such extraction as a "violation" of the Judgment. The issue of the Watermaster's interpretation of the Judgment regarding these issues is pending before the Court.

#### Introduction

The Central Basin Watermaster Service Area overlies about 227 square miles of the Central Basin in southeastern Los Angeles County. Figure 1 shows the location and boundaries of the Central Basin Watermaster Service Area. The Watermaster Service Area is bounded by the Newport-Inglewood Uplift on the southwest, the Los Angeles-Orange County line on the southeast, and an irregular line that approximately follows Stocker Street, Martin Luther King Boulevard, Alameda Street, Olympic Boulevard, the boundary between the City of Los Angeles and unincorporated East Los Angeles, and the foot of the Merced Hills and Puente Hills on the north. Twenty-three incorporated cities and several unincorporated communities are found within the Watermaster Service Area. Groundwater from the Central Basin provides a substantial portion of the water supply needed by the residents, businesses, and industries in the area overlying the Basin.

More than 60 years ago, groundwater overdraft and declining water levels in the Central Basin (Basin) threatened the area's groundwater supply and caused the intrusion of sea water into the southern part of the Basin. However, timely legal action and adjudication of the water rights halted the overdraft and helped to prevent further damage to the Basin. Since that time, groundwater extraction from the Basin is limited to the amounts set by a Superior Court Judgment<sup>5</sup> and is monitored by a Court-appointed Watermaster.<sup>6</sup>

<sup>&</sup>lt;sup>1</sup> Provisional information from Los Angeles County Department of Public Works.

<sup>&</sup>lt;sup>2</sup> Excludes extractions by parties with non-consumptive water use permits and extractions by nonparties.

<sup>&</sup>lt;sup>3</sup> Last year's report included non-party water use.

<sup>&</sup>lt;sup>4</sup> Includes groundwater imported from the San Gabriel Basin.

<sup>&</sup>lt;sup>5</sup> Central and West Basin Water Replenishment District, etc., vs. Charles E. Adams, et al., Los Angeles County Superior Court Case No. 786,656, Second Amended Judgment, May 6, 1991.

The Watermaster assists the Court in the administration and enforcement of the provisions of the Judgment.<sup>7</sup> Among other duties, the Watermaster monitors extractions and reports all significant water-related events in the Central Basin to the Court and to the parties to the Judgment. The activities of the Watermaster are key components for the effective management of the groundwater resources of the Central Basin.

This report, which is required by the Judgment,<sup>8</sup> summarizes the activities of the Watermaster, the conditions of the groundwater supply, and the quantities of water used in the area overlying the Basin and for the replenishment of the Basin; it also includes a financial report for the 2011-2012 fiscal year.<sup>9</sup>

#### Water Use

Water used in the area overlying the Central Basin includes groundwater extracted from the Basin, imported water, and recycled water. Figure 2 shows the water use since 1953.

**Extractions by Parties** The Judgment limits the amount of groundwater each party may extract annually from the Central Basin.<sup>10</sup> This limit, referred to as the Allowed Pumping Allocation (APA), is shown in Table 1 for each party. A recipient of Exchange Pool water may pump the amount released to it in addition to its APA. The volume of water extracted from each well is reported monthly.<sup>11</sup> Table 2 lists, by party, the volume of groundwater extracted each month from each active well in the Basin. Figure 3 shows the pattern of groundwater extractions during 2011-2012.

To provide flexibility in the control of groundwater extractions, the Judgment contains provisions allowing each party to carry over into the succeeding administrative year<sup>12</sup> a portion of its unused APA and in some cases to over extract.<sup>13</sup> This flexibility was necessary to meet unforeseen water demand.

One provision allows each party to carry over from one administrative year to another any unused APA not to exceed 20 percent of its APA or 20 acre-feet, whichever is greater.<sup>14</sup> In addition, any unused Exchange Pool water can be carried over into the following fiscal year.

**Overextractions** The Judgment provides for overextractions under certain conditions.<sup>15</sup> A party may over extract by 20 percent of its APA or 20 acre-feet, whichever is greater.<sup>16</sup>

<sup>11</sup> Parties extracting small volumes of water report extractions quarterly.

<sup>&</sup>lt;sup>6</sup> Judgment Part II.

<sup>&</sup>lt;sup>7</sup> Judgment Part II. 1.

<sup>&</sup>lt;sup>8</sup> Judgment Part II. 1. (d)

<sup>&</sup>lt;sup>9</sup> July 1 through June 30

<sup>&</sup>lt;sup>10</sup> Judgment Part I. 2.

<sup>&</sup>lt;sup>12</sup> July 1 through June 30

<sup>&</sup>lt;sup>13</sup> Judgment Part III. Subpart B.

<sup>&</sup>lt;sup>14</sup> Judgment Part III. Subpart A. 1. The Judgment was amended to permit each party to carry over a maximum of 100 percent of its APA from 1976-1977 and 1977-1978 because of drought.

<sup>&</sup>lt;sup>15</sup> Judgment Part III. Subpart B.

When a party overextracts in violation of the Judgment, Watermaster notifies the party to resolve the overextraction issue. Under certain circumstances, a party may overextract in a greater amount; however, prior approval must be obtained from the Watermaster.<sup>17</sup> The overextraction must be made up in the following administrative year unless Watermaster concludes that to require the party to make up the overextraction would create an unreasonable hardship for the party. In such cases, Watermaster may grant relief from the requirement that the party must make up the overextraction in the following year, such as prorating the reduction in the party's APA over a period of up to five years.<sup>18</sup>

Table 3 lists the names of parties that have over extracted groundwater during the year and shows the amount of overextraction by each party. During 2011-2012, five parties had a combined overextraction of 22,489.24 acre-feet. The table also identifies one party, State of California (CalTrans), that has over extracted in violation of the Judgment. Since 1997-1998, CalTrans has been pumping groundwater for dewatering beneath the 105 freeway in Downey.<sup>19</sup> CalTrans extracted 22,227.69 acre-feet of water during 1997-1998 through 2010-2011 and 617.06 acre-feet in 2011-2012. Watermaster has suspended its effort to address the overextraction of groundwater by CalTrans.<sup>20</sup>

**Extractions by Nonparties** Table 4 shows extractions by nonparties totaled 4.37 acre-feet. Extractions by nonparties are shown by well and by month in Table 2.

**Extractions of Contaminated Groundwater** Any party may petition the Water Replenishment District of Southern California (WRD) for a Non-consumptive Water Use Permit (NCWUP) as part of a project to remedy or ameliorate groundwater contamination. If the petition is granted, the party may extract the groundwater without the production counting against its production rights.<sup>21</sup> Table 5 lists current Non-consumptive Water Use Permits issued by WRD and the amounts of groundwater extracted under those permits during 2011-2012.

**Transfers of Allowed Pumping Allocations** Each year, APAs are transferred between parties through sales and leases. Table 6 shows the succession of APAs in the Basin as of June 30, 2012. Sales have reduced the number of parties from 508 in 1966-1967 to 132 in 2011-2012. Figure 4 shows samples of suggested water rights transfer agreements.

Table 7 shows transfers of APAs through sales and leases. During 2011-2012 there were four sales of APAs that totaled 766.00 acre-feet and 44 leases that totaled 19,141.47 acre-feet. Each party's APA, as of June 30, 2012, is also shown in Table 1.

<sup>&</sup>lt;sup>16</sup> Judgment Part III. Subpart B. 1. (a)

<sup>&</sup>lt;sup>17</sup> Judgment Part III. Subpart B. 1. (b)

<sup>&</sup>lt;sup>18</sup> Judgment Part III. Subpart B. 2.

<sup>&</sup>lt;sup>19</sup> CalTrans has been discharging this water to the Los Angeles and the San Gabriel Rivers after treatment through granulated activated carbon units.

<sup>&</sup>lt;sup>20</sup> In a letter to the Director of the Department of Water Resources, dated September 25, 2008, the Central Basin Water Association, which represents the majority of the water right holders, said that taking legal action against Caltrans to address overextraction from the Central Basin "may at best confuse the issues before the court [regarding groundwater storage], and at worst create unnecessary delay and difficulty for a judge to resolve both questions."

<sup>&</sup>lt;sup>21</sup> Judgment Part III. Subpart B. 7.

When land is sold on which a water right has been developed, the Watermaster must be furnished a copy of the sale document if the water right is also sold. The water right does not pass to the new land owner unless the sale document specifies that the water right was sold with the land. For the proper accounting of the water right, the sale document must specify the exact amount of water right.

In transferring water rights, parties must specify (1) the type of right (i.e., APA, normal carryover, or drought carryover), (2) the amount of right to the nearest 0.01 acre-foot, and (3) the period of the lease, if applicable. Moreover, all leases must be made on a fiscal year basis and must be executed by the parties and received by Watermaster by June 30 of the year in which the lease is effective.

For parties wanting to buy, sell, or lease water rights, Watermaster maintains a web page.<sup>22</sup> Any party wishing to be listed should call the Watermaster. This is a courtesy to assist parties unable to resolve problems regarding a surplus or deficiency of water supply. Watermaster will make no recommendation regarding transactions conducted relative to the use of this service.

**Exchange Pool** The Judgment authorizes an Exchange Pool to provide additional water rights to parties without sufficient water.<sup>23</sup> If a party's estimated water requirement for the following fiscal year exceeds its total available water supply, that party may request additional water from the Exchange Pool. Any party wishing to purchase water from the Exchange Pool must file the request with the Watermaster before April 1. If no requests are received by April 1, the Exchange Pool will not operate in the following fiscal year, and Watermaster will not process Exchange Pool forms. Table 8 shows that there were no requests for Exchange Pool water during 2011-2012.

Status of Extraction Wells In the Central Basin there are 312 reported active extraction wells and 223 reported inactive extraction wells (Table 2). The locations of the active extraction wells are shown on Figure 3. Table 9 shows two new extraction wells were completed, and three extraction wells were destroyed.

**Meter Testing Program** Accurate measurement of groundwater extractions is essential for the successful management of groundwater in the Central Basin. Therefore, Watermaster requires an operative water meter to be installed at each extraction well.<sup>24</sup> It is the responsibility of each party to ensure that its meter and test facilities are installed properly and are maintained in good working condition. It is the goal of Watermaster to test the water meter at each active extraction well at least once every two years or when a party requests a meter calibration.<sup>25</sup> Watermaster tests meters by volumetric or pitot comparisons. Watermaster notifies a party that it must repair or replace its meter when the meter registers beyond 5 percent accuracy. Watermaster calculates the monthly water production for each well using the meter readings and Unit of Measure Code reported for the well that month. If

<sup>&</sup>lt;sup>22</sup> www.water.ca.gov/watermaster

 <sup>&</sup>lt;sup>23</sup> Judgment Part III, Subpart C.
 <sup>24</sup> Judgment Part II. 1. (b)

<sup>&</sup>lt;sup>25</sup> Judgment Part II. 1. (c)

the registration accuracy of the meter deviates by as much as 10 percent, the calculated well production could be subject to revision.<sup>26</sup>

During 2011-2012, Watermaster visited 59 parties, tested 213 meters, and performed 50 well investigations. Tests showed that three meters were more than 5 percent fast, with registration accuracies of plus 13 percent to plus 29 percent, and no meters were more than 5 percent slow. Meters at three sites were inoperative, and meters at three sites could not be tested because the well sites lacked test points, or the pumps were inoperative. Watermaster notified and required the responsible parties to make the needed repairs.

## Water Supply

Water supplies available to the communities overlying the Central Basin include groundwater extracted from the Basin, imported surface water and groundwater, and recycled water.

**Precipitation** Because layers of materials of low permeabily overlie the primary waterproducing aquifers throughout much of the Central Basin, and largely impermeable surfaces (i.e., pavement and buildings) cover most of the forebay areas, precipitation over the Basin has relatively little direct influence on the replenishment of the groundwater in the Basin. However, during years of high rainfall, increased runoff from the areas upstream of the Central Basin would result in increased replenishment to the Basin and would probably result in decreased water demand by the water users overlying the Basin which, in turn, could result in lower rates of groundwater extraction from the Basin.

During 2011-2012, the following amounts of precipitation were measured at six precipitation stations: 7.05 inches at 96<sup>th</sup> and Central, 8.41 inches at Montana Ranch, 6.75 inches at La Mirada, 7.38 inches at Whittier City Yard, 7.71 inches at USC, and 7.76 inches at Imperial Yard.<sup>27</sup> Figure 1 shows the locations of these precipitation stations, and Figure 5 shows the monthly average of the rainfall measured at these stations. Based on the rainfall measured at these stations, the mean precipitation over the Central Basin was 7.51 inches, which is 55 percent of the long-term mean precipitation at these stations.<sup>28</sup>

**Groundwater Recharge** Natural replenishment of the groundwater in the Central Basin is largely from surface flow and underflow through Whittier Narrows from the San Gabriel Valley. As was mentioned above, little of the rainfall over the Central Basin would be likely to infiltrate into deeper aquifers of the Basin.

Intentional replenishment of groundwater in the Central Basin is accomplished by spreading water at the Rio Hondo and the San Gabriel River spreading grounds in the Montebello

<sup>&</sup>lt;sup>26</sup> The Board of Directors of the Central Basin Water Association concurs with this Watermaster policy regarding adjustments to reported well production amounts.

<sup>&</sup>lt;sup>27</sup> Provisional data provided by Los Angeles County Department of Public Works.

<sup>&</sup>lt;sup>28</sup> Calculation of the long-term precipitation included the Downey Fire Department precipitation station rather than the Imperial Yard station.

forebay (Figure 1).<sup>29</sup> The sources of this replenishment water include local storm runoff, purchased imported water, and recycled water from three reclamation plants located upstream of the Central Basin.<sup>30</sup> Table 10 shows the sources and quantities of water spread to replenish the groundwater. In 2011-2012, replenishment water included 40,333 acre-feet of local storm runoff (which is 67,374 acre-feet less than in 2010-2011), 51,750 acre-feet of recycled water, and 13,082 acre-feet of purchased imported water. Local runoff accounted for 38 percent of the water, recycled water accounted for 49 percent, and the purchased imported water accounted for 13 percent.

**In-Lieu Replenishment** During the 1965-1966 water year,<sup>31</sup> the WRD, in cooperation with the Metropolitan Water District of Southern California (MWD), began an in-lieu replenishment program. WRD may contract with any producer having access to supplemental water that could be used in lieu of extracting groundwater from the Basin.<sup>32</sup> The use of supplemental water in lieu of pumping groundwater does not change a party's water right,<sup>33</sup> but it counts as water pumped under the Judgment. The program may be used to (1) alter pumping patterns within the Basin, (2) replenish the groundwater in areas of low transmissivity where conventional recharge techniques are ineffective, (3) heighten the effect of injecting water to form a sea water barrier by reducing extractions, (4) reduce the amount of replenishment water purchased by WRD, and (5) reduce the annual extractions from the Basin.

Table 11 shows that the City of Long Beach participated in the in-lieu replenishment program.

**Imported Water** Water is imported from northern California via the State Water Project and from the Colorado River and is made available to water users by MWD through its member agencies: Central Basin Municipal Water District (CBMWD) and the Cities of Compton, Long Beach, and Los Angeles. The City of Los Angeles also imports water from the Owens River-Mono Basin, and the California Domestic Water Company, the San Gabriel Valley Water Company, the Suburban Water Systems, and the City of Whittier import groundwater from the San Gabriel Valley groundwater basin, which lies to the northeast and upstream of the Central Basin. Table 12 shows that in fiscal year 2011-2012, a total of 128,465 acre-feet of water was imported to the area overlying the Central Basin. The Water Replenishment District of Southern California (WRD) purchased 13,082 acre-feet of seasonally discounted spreading water in July and August 2011 for spreading and replenishment. Since August 2011, the Metropolitan Water District of Southern California (MWD) discontinued the delivery of discounted water for groundwater replenishment.

<sup>&</sup>lt;sup>29</sup> Water injected at the Alamitos Barrier Project also contributes to the replenishment of the Central Basin.

<sup>&</sup>lt;sup>30</sup> The three water reclamation plants are the Whittier Narrows, San Jose Creek, and Pomona plants. The locations of the first two plants are shown on Figure 1, but the Pomona plant is farther upstream and is not shown on the figure.

<sup>&</sup>lt;sup>31</sup> October 1, 1965 through September 30, 1966

<sup>&</sup>lt;sup>32</sup> California Water Code Section 60230(p).

<sup>&</sup>lt;sup>33</sup> Water Code Section 1005.1

### Quality of Imported Water

		State Water
Constituent	Colorado River Water <sup>34</sup>	Project Water <sup>35</sup>
	(mg/L)	(mg/L)
Chloride	87	52
Sulfate	222	48
Hardness (as CaCO <sub>3</sub> )	278	111
Total Dissolved Solids	581	244

**Exported Water** California-American Water Company exported 2,526.59 acre-feet of groundwater from the Central Basin to its service area that overlies a portion of the West Coast Basin.

**Recycled Water** Table 13 shows that 13,758 acre-feet of recycled water were used in the area overlying the Central Basin during 2011-2012. This amount is 467 acre-feet more than that used in 2010-2011. These amounts do not include the recycled water used to replenish groundwater in the Central Basin.

Alamitos Sea Water Intrusion Barrier Project Sea water intrusion in the Alamitos Gap near the mouth of the San Gabriel River poses a threat to the groundwater in the Central Basin. The Alamitos Barrier Project is designed to prevent sea water intrusion into the fresh water aguifers of the Basin. The location of the barrier is shown on Figure 1. The Los Angeles County Department of Public Works operates the barrier project, which is comprised of four extraction wells that can be used to create a groundwater trough and 43 injection wells that create a groundwater ridge to halt sea water intrusion. In addition, the project includes 220 observation wells that are used to monitor groundwater levels and guality in the area. Table 14 shows the guantities of imported water and of recycled water injected into the barrier wells and the quantity of water extracted. Figure 6 shows the quantities of water used in the barrier project since operation of the project began in 1965. The sea water intrusion problem has been contained by the barrier project.

Groundwater Levels Figure 7 shows the locations of selected wells that are used to monitor groundwater level elevations. Figure 8 shows the water level elevations in key wells located in the Montebello forebay, and Figure 9 shows the water level elevations in wells perforated in the principal water producing aguifers in the Basin.

### Watermaster Administration Costs and Budget

The Judgment requires Watermaster to report its administration costs.<sup>36</sup> Table 15 shows that Watermaster income was \$608,647, and that expenditures were \$503,367.

<sup>34</sup> at Lake Mathews <sup>35</sup> at Castaic Lake

<sup>&</sup>lt;sup>36</sup> Judgment Part II. 1. (d)

The Judgment requires Watermaster to prepare an annual budget and to apportion it among the parties.<sup>37</sup> The total amount billed was \$443,000, and the total amount paid was \$445,401.39. The budget was submitted to the Parties on May 1, 2011, and it was adopted as the final budget on June 1, 2011. Table 16 shows the approved budget of \$590,000.

Table 17 shows the apportionment of the budget among the parties. A penalty of 5 percent is assessed if payments become delinquent. Eight parties were penalized because their payments were not made within the allowable 30 days after service of the invoice. Late fees totaling \$2,421.39 were collected for deliquent payments.

## Significant Water-Related Events

Water rights in the Central Basin were adjudicated in the 1960s. A provision to store water in the Basin for later extraction was not specifically included in the Judgment language. On March 30, 2009, some of the parties to the Judgment filed a motion to amend the Judgment to allow for water storage in the Basin. The Los Angeles County Superior Court assigned the motion to Judge Holly E. Kendig.

Prior to the hearing, the Cities of Cerritos, Downey, and Signal Hill sought to enjoin the amendment claiming that the public entities seeking the amendment did not comply with the California Environmental Quality Act (CEQA) prior to filing with the Court. This matter was assigned to Judge James Chalfant who denied the motion on February 9, 2010. Judge Chalfant held that the amendment proponents did not approve a "project," the groundwater storage program, when the parties joined to file papers with the Court. The groundwater storage program could only be approved if the Court granted the amendment (courts are public entities exempt from CEQA).

Opponents of the proposed amendment to the Judgment also challenged the jurisdiction of the Court to hear the motion to amend. On May 12, 2010, Judge Kendig found that the original Judgment did not encompass storage rights. Therefore, she could not now add this provision to the Judgment. She ruled that proponents of the storage amendment, if they choose to proceed, would need to file a new complaint and undergo an entirely new proceeding, including trial, rather than attempting to amend the current Judgment.

On August 19, 2010, the proponents of the storage amendment filed notice appealing Judge Kendig's ruling, and on January 18, 2012, the Court of Appeal reversed Judge Kendig's ruling in full. In early February 2012, opponents of the amended Judgment filed petitions with the Court of Appeal for a rehearing, but the Court denied those petitions. On May 9, 2012, the State Supreme Court denied a petition for review of the decision of the Court of Appeal.

On November 30, 2011, CBMWD released a draft Program Environmental Impact Report (PEIR) for a Groundwater Storage Plan for the Central Basin.<sup>38</sup>

<sup>&</sup>lt;sup>37</sup> Judgment Part II. 1. (e)

<sup>&</sup>lt;sup>38</sup> http://www.centralbasin.org/groundwaterstorageplan.html

On July 13, 2011, Judge Kendig stayed the implementation of a WRD-declared drought emergency.<sup>39</sup> On December 29, 2010, CBMWD filed a petition to set aside a "Resolution of Declared Water Emergency" adopted by WRD. CBMWD contended that WRD violated CEQA and contended other causes. On June 6, 2011, Judge McKnew dismissed CBMWD's petition, granting WRD's demurrer. CBMWD filed its Notice of Appeal on August 8, 2011.

On September 19, 2011, CBMWD motioned the Court for an order declaring that extraction of non-native imported water does not diminish a Party's Allowed Pumping Allocation under the Judgment. On February 6, 2012, the Court stayed action on the motion.<sup>40</sup>

1 See Table 6 and Table 7 for information concerning leases, transfer of water right entitlements, or prior ownership. Lease with flex includes carryover provisions.

<sup>2</sup> Allow able Extraction = Allow ed Pumping Allocation + Carryover + Leases

<sup>3</sup> Balance = Allow able Extraction - Amount Pumped - In-Lieu

<sup>4</sup> Sold: 100.00 acre-feet from The New ark Group, Inc to Aqua Capital Management LP.

<sup>5</sup> Sold: 1.00 acre-foot from Arzouman, Charles and Nvart to Taurek, Mary.

<sup>6</sup> Party extracts water under a non-consumptive water use permit. See Table 5.

7 Sold: 300.00 acre-feet from PABCO Building Products, LLC to Petersburg, L.P.

<sup>8</sup> Sold: 365.00 acre-feet from United States Gypsum Company to Puente Basin Water Agency.
