Summary of Pertinent Data

Item	Administrative Year 2024 - 2025	Administrative Year 2025 - 2026
Parties	151	151
Rights Holders	117	116
Active pumpers	62	58
Active non-parties	0	0
Allowed pumping allocation (acre-feet)	217,367	217,367
Water put into Storage (acre-feet) ¹	41,687	39,266.12
Mean Precipitation (inches)	5.49	16.13
Injection at the Alamitos Barrier project (acre-feet) ²	3,153	2,891
Spreading operations (acre-feet) ³	94,938	188,883
Watermaster Budget, total ⁴	\$318,264	\$326,742
Exported water use (acre-feet) ⁵	1,793	2,176
APA Extractions (acre-feet) ⁶	128,301.86	131,540.89
Storage Production (acre-feet)	40,664.58	38,974.63
Recycled water use by entities (acre-feet)	13,942	14,089
Imported water use by entities (acre-feet) ⁷	103,779	PENDING
Total Water Use by Parties (acre-feet)	286,687	

¹ Includes carryover conversion corrections of 1,644.24 af (Table 2).

² Only includes injection from the Los Angeles County portion of the Alamitos Barrier.

³ Provisional information from the Los Angeles County Department of Public Works (includes advanced treated water).

⁴ For 2025-2026 AY, Water Rights Panel assessment was \$54,342 Administrative Body assessment was \$272,400.

⁵ Cal American Water Company exported groundwater to its service area that overlies the West Coast Basin.

⁶ Excludes extractions by parties and non-parties with non-consumptive water use permits.

⁷ Includes groundwater imported from the San Gabriel Basin.

Introduction

Executive Summary

This 2025-2026 Watermaster Report, developed by the Administrative Body and adopted by the Water Rights Panel, provides information on groundwater extractions, storage accounts, use of imported water and recycled water, replenishment operations, and the budget and finances of the Central Basin (Basin) Watermaster during the 2025-2026 administrative year (AY). This report complies with the provisions set forth in the Central Basin Third Amended Judgment (Judgment).

During 2025-2026 AY, the Basin experienced an increase in groundwater extractions (production and storage withdrawals) in comparison to the previous AY. Furthermore, no imported water was purchased by the Water Replenishment District of Southern California (WRD) for spreading at the Montebello Forebay.

This report is organized into three sections, including Water Use, Water Supply, and Watermaster Costs and Budget. In addition, the report provides various tables and figures describing the narrated information.

Background

The Central Basin Watermaster Service Area overlies approximately 227 square miles of the Basin in southeastern Los Angeles County. Figure 1 shows the location and boundaries of the Central Basin Watermaster Service Area (adjudicated boundary). The Watermaster Service Area is bounded by the Newport-Inglewood Uplift on the southwest, the Los Angeles-Orange County line on the southeast, and an irregular line that approximately follows Stocker Street, Martin Luther King Boulevard, Alameda Street, Olympic Boulevard, the boundary between the City of Los Angeles and unincorporated East Los Angeles, and the foot of the Merced Hills and Puente Hills on the north. Twenty-three incorporated cities and several unincorporated communities lie within the Watermaster Service Area. Groundwater from the Basin provides a substantial portion of the water supply needed by the residents, businesses, and industries in the area overlying the Basin.

More than 60 years ago, groundwater overdraft and declining water levels in the Basin threatened the area's groundwater supply and caused the intrusion of seawater into the aquifers in the southern part of the Basin. However, timely legal action and adjudication of the water rights halted the overdraft and prevented further damage to the Basin. Since that time, groundwater extraction from the Basin was limited to the amounts set by a Superior Court Judgment and monitored by a Court-appointed Watermaster.

The first Judgment was finalized and signed in 1965, and it appointed the Department of Water Resources (DWR) as the Watermaster. Since its inception, the Judgment has been amended three times. The Judgment was first amended in 1980 to transition the administrative year from a water

year (October 1 to September 30) to a fiscal year (July 1 to June 30). The Judgment was amended for the second time in 1985 to modify the annual budget (\$20 minimum assessment) and exchange pool provisions. In addition, the second amendment modified carryover and overproduction provisions, defined carryover, and provided for exemptions for extractors of contaminated groundwater. The Third Amended Judgment was finalized on December 23, 2013. For the first time, the Court allowed Parties to have direct input into how the Judgment is administered and enforced. The Judgment confirmed the retirement of DWR as the Watermaster and created three separate bodies that assist the Court in the administration and enforcement of the provisions of the Judgment.

The first body is the Administrative Body, which administers the Watermaster accounting and reporting functions. The WRD was appointed by the Court to fulfill this role.

The second body is the Water Rights Panel, which enforces issues related to the pumping rights within the adjudication. The Water Rights Panel is made up of seven water rights holders who are elected by rights holders in the Central Basin. Members of the Water Rights Panel during the 2025-2026 AY included Bellflower-Somerset Mutual Water Company, City of Downey, Golden State Water Company, City of Lakewood, City of Long Beach, City of Whittier, and City of Vernon.

The third body is the Storage Panel, which is comprised of the Water Rights Panel and the WRD Board of Directors; together they review and approve certain groundwater storage efforts.

Water Use

A. Allowed Pumping Allocation Extractions by Parties

The Judgment limits the amount of groundwater each Party to the Judgment may extract annually from the Basin. This amount is known as the Party's Allowed Pumping Allocation, or "APA". The APA for each Party is listed in Table 1a. Parties are required to report groundwater extractions to the Administrative Body monthly (or quarterly for smaller producers). In addition, Table 1b lists the total drought carryover rights for the parties that hold them. Appendix A lists, by Party, the volume of groundwater extracted monthly from each active well in the Basin. Figure 1 describes the variation of groundwater production by three distinct production classifications: less than 500 acre-feet per year (afy), 500 to 2,000 afy, and more than 2,000 afy, during the 2024-2025 AY. In addition, Figure 2 illustrates the monthly water production (excluding non-consumptive use) for the 2025-2026 AY, which totaled 170,515.52 af (includes 38,974.63 af of storage production), which is a 0.9% total production increase from the previous AY.

To provide flexibility regarding groundwater extractions, the Judgment contains provisions, such as the "One-Year Carryover", which allows each Party to carryover into the succeeding administrative year a portion of its unused APA. Specifically, Parties are allowed to carryover unused rights up to the greater of:

- 60% of their APA plus (+) or minus (-) any leases with flex or 20 af, whichever is more, less the amount of water in a Party's storage account; or
- 20% of a Party's APA

This type of provision is necessary to meet unforeseen water demands. In addition, any unused Exchange Pool water, discussed in Section (I), is carried over into the following AY.

B. Storage Transactions

The Judgment allows Parties with water rights to store water in the Basin for later extraction. In 2022-2023 AY, an updated interpretation of the carryover conversion to storage provision went into effect. Specifically, the carryover conversion changed from allowing only one-year carryover to be converted into storage to allowing both one-year and current AY carryover to be converted into storage. Furthermore, parties are required to pay the Replenishment Assessment to WRD for all carryover conversion to storage.

On May 12, 2022, the Water Rights Panel reviewed and approved the updated interpretation of carryover conversion. Subsequently, the Administrative Body updated their rules to reflect the new interpretation. The updated interpretation references, Section III.A.(2) of the Judgment states that a party having carryover may elect to convert all or part into stored water. Therefore, parties may convert one-year carryover and current AY carryover into storage. This process allows parties to

put more water into storage in any given year. Current AY carryover is defined as water rights that will not be extracted or leased out prior to the end of the current AY. To convert current AY carryover, parties must exhaust their one-year carryover balance and then may choose to convert current AY carryover. Any carryover conversion is subject to storage capacity limits in accordance with the Judgment. Table 2 describes storage accounting including total carryover from 2024-2025 AY and storage activity for 2025-2026 AY.

In addition, there were three carryover correction agreements implemented during the 2022-2023 AY. Specifically, there was a carryover conversion calculation error identified in 2021-2022 AY. The calculation error resulted in carryover to be less than it should have been in the ensuing AY. The error impacted specific parties that withdrew from storage between the 2013-2014 to 2018-2019 AY. The agreements for each party state that they will be credited specific storage amounts for five (5) years followed by paid annual installments (2022-2023 AY to 2026-2027 AY). The following parties will be credited annually as follows: City of Downey: 670.00 af, City of Lakewood: 794.34 af, and City of Long Beach: 179.90 af. Table 3 lists the quantity of water that was put into storage by each Party during the 2025-2026 AY. The overall total of water that was put into storage was 39,266.12 af including the carryover corrections, which is a 6% decrease from the previous AY.

In 2025-2026 AY a total of 38,974.63 af was extracted from storage by seven Parties, the details are in Table 4. The Judgment allows for the transfer of stored water between Parties. There were no transfers of stored water (Table 5).

Water rights holders may store up to 200% of their unused carryover rights. Rights holders have an Individual Storage Account (ISA) with a capacity of 50% and a Community Storage Pool (CSP) with a capacity of 150%. Water may be stored in the ISA indefinitely; however, for the CSP there is a ten-year limit. Pursuant to Section IV.E(6) of the Third Amended Judgment, water stored in the CSP for more than ten consecutive years is subject to an annual five percent (5%) loss, based on the lowest balance held during the preceding ten-year period. Water right holders are provided notice at least one year prior to the penalty date. The Party is required to withdrawal the full amount of water stored prior to the tenth year to avoid the 5% penalty loss.

In this 2025-26 AY, a 5% penalty (52.00 af) was assessed to Los Angeles Department Water and Power 's storage balance for water that reached the ten-year term. The penalty is accounted for in Table 1a, Table 2 and Table 6.

Table 6 provides a historical storage summary from 2013-2014 AY to 2025-2026 AY of water put into and extracted from storage, storage balances, and the available adjudicated storage capacity.

C. Regional Disadvantaged Communities Incentive Program

Section II.H. of the Judgment contains provisions for the development of a Regional Disadvantaged Communities Incentive Program (RDCIP) that allocates 23,000 af of storage space for the use or benefit of Disadvantaged Communities (DAC) within the Central Basin. A DAC is defined as any area that is served by a water purveyor and consisting of one or more contiguous census tracts, which based upon the most recent U.S. Census data, demonstrates a median household income which is less than eighty percent (80%) of the median household income for all

Census Tracts within the State of California. This program was developed by the Water Rights Panel during the 2014-2015 AY and approved by the Court in June 2015.

There were no requests for participation in the RDCIP in the 2025-2026 AY.

D. Total Extraction Right and Over-extraction

The total extraction right is the maximum amount of groundwater that can be extracted in a single AY. In the Central Basin, Parties with carryover and/or storage rights are allowed to extract up to 140% of the sum of their APA plus or minus (+/-) leased water rights.

For example, if a Party has an APA of 1,000 af, 400 af of stored water rights, and leased in an additional 200 af, their total extraction right would be calculated as follows:

$(1,000 + 200) \times 1.4 = 1,680$ af. Conversely, if the Party leased out 200 af, their total extraction right would be $(1,000 - 200) \times 1.4 = 1,120$ af. Parties with no carryover and/or storage rights may over-extract 20% of their APA plus or minus (+/-) leased water or 20 af, whichever is greater.

Under certain circumstances, a Party may extract in a greater amount if they receive prior approval from Watermaster. Any Party that exceeds their total extraction right without prior approval from Watermaster is in violation of the Judgment.

Any over-extraction, which is the difference between total rights and total extractions, is deducted from that Party's subsequent administrative year's APA. The over-extraction must be reconciled in the following administrative year unless Watermaster concludes that making up the over-extraction would create an unreasonable hardship for the Party. In such cases, Watermaster may pro-rate the reduction in the Party's APA over a period of up to five years. The Watermaster will notify a Party when they are in violation of the Judgment and/or over-extract.

During the 2025-2026 AY, there was one party with an over-extraction, Caltrans. Caltrans has had a significant over-extraction carryover from previous years, resulting from dewatering under the 105 Freeway (Table 7).

E. Extractions by Non-Parties

There were no reported extractions by Non-Parties this AY (Table 8).

F. Extractions of Contaminated Groundwater

A Party may petition WRD for a Non-Consumptive Water Use Permit (NCWUP) as part of a project to remediate or ameliorate groundwater contamination. If the petition is granted, the Party may extract the groundwater without counting against its production rights, so long as the conditions of the Judgment are met. A non-Party may extract contaminated groundwater for cleanup purposes by partnering with a Party who obtains the NCWUP and then assigns it to the non-Party.

Table 9 lists current NCWUPs issued by WRD, and the amounts of groundwater extracted under those permits. In the 2025-2026 AY there were 257.34 af of NCWUP extractions via six permits. Appendix A reports these extractions monthly by well.

G. Allowed Pumping Allocation Transfers

Each year, APAs are transferred between Parties through leases (temporary transfers) and sales (permanent transfers) transactions. Table 10 shows transfers of APAs through leases, specifically the parties involved, transaction type, amount, and recordation date. During the 2025-2026 AY there were 32 leases that transferred 19,628.50 af (25 leases with flex and 7 leases without flex). Leases with flex transfer both the pumping right and associated carryover rights to the lessee for the term stated within the lease agreement.

In transferring water rights, Parties must specify (1) the type of right (i.e., APA, one-year carryover, or drought carryover); (2) the amount of right to the nearest 0.01 af; and (3) the period of the lease, if applicable. Moreover, all leases must be made on an administrative year basis and must be executed by the Parties and received by Watermaster no later than one month and 15 days following the end of the AY in which the lease is effective.

Table 11 shows permanent transfers of APA and carryover. There were three permanent transfers of APA totaling 8.14 af and carryover transfers totaling 20.00 af.

The permanent transfer of water rights must be documented accordingly. For example, when land is sold on which a water right has been developed, the Watermaster must receive a copy of the transfer document if the water right is also transferred. Water rights do not automatically pass to the new landowner when land is sold, unless the transfer document specifies that the water right was transferred with the land. For the proper accounting of the water right, the transfer document must specify (1) the type of right (i.e., APA, one-year carryover, drought carryover, or stored water) and (2) the exact amount of water right(s) transferred. Watermaster provides a template for a Deed of Water Rights-Permanent Transfer transaction on its website to ensure the information provided is sufficient.

For the 2025-2026 AY, there were 151 Parties to the Judgment (individuals or entities that have a privilege or obligation to the Judgment) and 116 Water Rights Holders. Compared to the previous AY, there was a decrease of one water rights holder, Richard Hathaway Jr who permanently transferred their APA to an existing water rights holder. Appendix B shows the succession of each party's APA, and Appendix C lists current Parties to the Judgment and Water Rights Holders, including non-parties that own water rights.

H. Exchange Pool

The Judgment authorizes an Exchange Pool to provide additional water rights to Parties without sufficient water. If a Party's estimated water requirement for the following AY exceeds its total available water supply, that Party may purchase additional water from the Exchange Pool. Any Party wishing to purchase water from the Exchange Pool must file a request with the Watermaster before April 1. If no requests are received by April 1, the Exchange Pool will not operate in the

following AY, and Watermaster will not process Exchange Pool forms. There were no requests for Exchange Pool water during the 2025-2026 AY (Table 12).

I. Status of Extraction Wells

In 2025-2026 AY, there were 251 wells with reported extractions, which is one well less from the prior AY. There were zero extraction wells reported completed (Table 13) and one well reported destroyed (Table 14). The location of the wells and their relative amounts pumped are shown in Figure 1.

J. Meter Testing Program

Accurate measurement of groundwater extractions is essential for the successful management of groundwater in the Basin. Therefore, Watermaster requires an operative water meter to be installed at each extraction well. It is the responsibility of each Party to ensure that its meter and testing facilities are installed properly and are maintained in good working condition. It is the goal of Watermaster to test the water meter at each active extraction well at least once every two years or when a Party requests a meter calibration. Watermaster tests meters by volumetric or pitot tube comparisons. Watermaster notifies a Party that it must repair or replace its meter when the meter registers beyond five percent accuracy. Watermaster calculates the monthly water production for each well using the meter readings and Unit of Measure Code reported for the well that month. If the registration accuracy of the meter deviates by as much as five percent, the calculated well production could be subject to revision.

The meter testing program is managed by the Water Rights Panel. The meter testing services are currently administered by the Department of Water Resources (DWR). During the 2025-2026 AY, the DWR visited 19 Parties and performed 98 tests. Tests showed that zero meters were inconclusive, and one meter failed, which means the meter was either more than five percent fast or slow. The Watermaster Administrative Body notified pumpers to schedule repair and retesting of failed meters in a timely manner.

The meter testing contract between DWR and the Water Rights Panel ended on June 30, 2026. DWR was unable to extend the contract with the Water Rights Panel; therefore, the Panel will select a new meter testing firm in 2026-2027 AY.

This page intentionally left blank

Water Supply

A. Precipitation

Precipitation over the Basin has relatively minimal direct influence on the replenishment of the groundwater in the Basin. This is a result of the low soil permeability that characterizes the primary water-producing aquifers throughout much of the Basin and largely impermeable surfaces (i.e., pavement and buildings) covering most of the forebay areas. However, during the years of higher rainfall, increased runoff in the upstream areas of the Basin can result in increased replenishment to the Basin and decreased groundwater demand by the water users, which in turn can result in lower rates of groundwater extraction from the Basin.

During the 2025-2026 AY, the following amounts of precipitation were measured at five precipitation stations located throughout the Central Basin region:

- 14.72 inches at Los Angeles-RD241 (formerly 96th and Central)
- 15.43 inches at Montana Ranch
- 17.80 inches at University of Southern California
- 16.40 inches at La Mirada Station
- 16.28 inches at Imperial Yard

Figure 3 shows the locations of these precipitation stations, and Figure 4 shows the monthly precipitation average measured at the stations. Based on the total rainfall measured at the stations, the mean precipitation over the Central Basin was 16.13 inches, which is 131% of the long-term mean of 12.29 inches. The mean precipitation for 2025-2026 AY increased by 10.64 inches compared to the prior AY.

B. Groundwater Recharge

Natural replenishment of the groundwater in the Basin occurs largely from surface flow and underflow through Whittier Narrows from the San Gabriel Valley. As mentioned above, minimal rainfall over the Basin infiltrates into deeper aquifers of the Basin.

Intentional replenishment of groundwater in the Basin is accomplished by capturing and spreading river water at the Rio Hondo and the San Gabriel River Coastal Spreading Grounds in the Montebello Forebay (Figure 3). The sources of this replenishment water include local storm runoff, local dry weather urban runoff, imported water purchased from the Metropolitan Water District of Southern California (MWD), and recycled water purchased from Los Angeles County Sanitation Districts. There was 134,165 af in “local runoff”, which is an increase of 104,805 af or 357% compared to the previous AY. Table 15 shows the sources and quantities of water spread to replenish the groundwater for the 2024-2025 AY and 2025-2026 AY. Furthermore, WRD purchased no imported water for spreading, which is the seventh consecutive year that imported

water is not purchased. In addition, WRD purchased 44,631 af of recycled water for spreading, which is a 10,823 af or 20% decrease from the previous AY. The increase in recycled water recharge is directly related to the decrease in rainfall.

C. In-Lieu Replenishment

During the 1965-1966 water year, WRD, in cooperation with the MWD, began an in-lieu replenishment program, where discounted imported water was offered seasonally due to availability. WRD has contracted with producers having access to supplemental imported water that could be used in lieu of extracting groundwater from the Basin to reduce overall pumping impacts. There was no in-lieu recharge during the 2025-2026 AY (Table 16).

D. Imported Water

Water is imported from Northern California via the State Water Project and the Colorado River and is made available to water users by MWD through its member agencies: Central Basin Municipal Water District (CBMWD) and the City of Compton, City of Long Beach, and City of Los Angeles Department of Water & Power (LADWP). LADWP also imports water from the Owens River-Mono Basin. Furthermore, California Domestic Water Company, San Gabriel Valley Water Company, Suburban Water Systems, and the City of Whittier import groundwater from the San Gabriel Valley groundwater basin, which lies to the northeast and upstream of the Basin. In 2025-2026 AY, a total of XXX,XXX af of water was imported, for potable use, to the area overlying the Central Basin. Table 17 lists imported water use by source of water, Party, and quantity, not including WRD replenishment water.

E. Recycled Water

Table 18 shows that 14,089 af of recycled water was used in the area overlying the Basin during the 2025-2026 AY, not including WRD replenishment water. This was a decrease of 121 af from the previous AY.

F. Total Water Use

Figure 5 shows XXX,XXX af of total water use in the Basin during the 2025-2026 AY, including extracted groundwater, imported water, and recycled water for direct use.

G. Exported Water

In the 2025-2026 AY, the California-American Water Company exported 2,176.18 af of groundwater from the Basin to its service area that overlies a portion of the West Coast Basin, which is an increase of 383.66 af from the prior AY.

H. Increased Extraction in the Basin for Certain Purveyors Serving Overlying Communities

Per Section IV.K of the Judgment, "certain purveyors" are Parties to both the Central Basin Third Amended Judgment and the West Coast Basin Judgment and serve communities overlying both the Central and West Coast Basins. These purveyors include the City of Los Angeles, Golden State

Water Company, and California Water Service Company and are allowed to increase their extraction in the Central Basin beyond their APA. The increased extraction, which is limited to 5,000 af per AY, is counted against their adjudicated right (AR) in the West Coast Basin.

There were no increased extractions in 2025-26 AY.

I. Alamitos Gap Barrier Project

The Los Angeles County Public Works operates a seawater intrusion barrier to protect water supply wells located inland of the Alamitos Gap near the San Gabriel River (i.e. Alamitos Gap Seawater Barrier Project). The barrier lies in the Central Basin and Orange County, which is shown in Figure 3.

The quantities of imported and recycled water injected into the Los Angeles County side of the barrier in 2024-2025 and 2025-2026 AY are summarized in Table 19. There was a 0.3% increase in imported water use and a 16% decrease in recycled water use for injection from the previous AY.

J. Groundwater Levels

Figure 3 shows the location of the selected wells that are used to monitor groundwater level elevations in the Basin. Figure 6 shows the water level elevations in key wells located in the Montebello Forebay, Figure 7 shows the water level elevations in wells perforated in Principal Aquifers of the Basin, and Figure 8 shows the water level elevations in one well located in the Los Angeles Forebay. WRD's annual Engineering Survey and Report and Regional Groundwater Monitoring Report provide more information on groundwater levels. These reports are available on WRD's website.

Watermaster Costs and Budget

To fund Watermaster activities, both the Administrative Body and the Water Rights Panel have annual assessments that are levied on water rights holders under the terms of the Judgment.

The Administrative Body assessment applies to the rights holders that have extracted from the Central Basin within the current or past two administrative years (active groundwater producers). The assessment is a flat fee of twenty dollars (\$20) for each active rights holder. In addition, a proportion of the remaining Administrative Body budget is based on the APA of the active rights holder. For 2025-2026 AY, the Watermaster budget for the Administrative Body was \$272,400, which was a 3% increase from the prior AY. As required by the Judgment, this budget increase was approved by the Water Rights Panel.

Since 2013, the Administrative Body has implemented various tools to improve parties' access to their water rights information, including the development of the online water rights calculator (rights.wrd.org), which provides parties with real-time information regarding their water rights; various templates for leases, sales, storage and augmentation project applications; and customized water rights accounting support for each party.

Separately, the Water Rights Panel assessment is charged to all water rights holders, not just active rights holders, and it is based on their APA. The Water Rights Panel budget was \$54,342, which was \$0.25 per acre-foot, which remains unchanged from the prior AY.

The overall Watermaster budget was \$326,742 including the Administrative Body and Water Rights Panel Assessments, which is 2.6% or \$8,478 increase compared to the prior AY. Table 20 lists the budget summary for the 2025-2026 AY.

¹ APA - Allowed Pumping Allocation

² Net Carryover = Drought Carryover + One-year Carryover from the previous year (2024-2025 AY) less the amount of carryover conversion for the current year (2025-2026 AY).

See Table 1b for Drought Carryover totals.

See Table 3 for carryover conversion (water put into storage) per party for 2025-2026 AY.

Net carryover 2024-2025 AY will be negative due to over-extractions in prior years or from carryover conversion to storage of current administrative year carryover: Lakewood, City of; Long Beach, City of; South Gate, City of.

³ See Table 10 for information concerning leases. Lease with flex includes carryover provisions.

⁴ Storage includes all storage carryover conversions for 2025-2026 AY. See Table 2 for a summary of all Storage Accounting per party for 2024-2025 AY - 2025-2026 AY.

2024-2025 AY One-year Carryover Conversions: Downey, City of: 2,000.00 AF; Long Beach, City of: 6,538.40 AF; Signal Hill, City of: 440.52 AF; South Gate, City of: 2,236.60 AF

2025-2026 AY Current-year Carryover Conversions: Lakewood, City of: 5,732.00 AF; City of: Long Beach, City of: 15,410.96 AF, South Gate, City of: 5,263.40

⁵ Total Rights = Allowed Pumping Allocation + Net Carryover + Leases + Storage + Increased Extractions but does not equal the Annual Extraction Limit (see page 5, section D).

⁶ Production for 2025-2026 AY, does not include storage production.

⁷ Storage Production includes all withdrawals from a Party's Individual Storage Accounts and Community Storage Accounts, which totaled 38,974.63 af for 2025-2026 AY. See Table 4 for storage withdrawal amounts per party.

⁸ Total Production = Assessed Production + Storage Production.

⁹ Balance = Total Rights - Total Production

¹⁰ Carryover Correction Agreements (2022-2023 AY to 2026-2027 AY): Downey, City of: 670.00 AF; Lakewood, City of: 794.34 AF; Long Beach, City of: 179.90 AF

¹¹ Negative One-Year Carryover will be deducted from the subsequent year's APA.

¹² Los Angeles Department of Water and Power's storage balance includes a 52.00 acre-foot deduction, reflecting the 5% ten-year term penalty applied to the community storage quantity stored in 2015-2016 AY.

¹ The Community Storage Balance was reduced by 52 AF for LADWP, reflecting a required 5% water loss under the CSP ten-year term limit per the Third Amended Judgment.

Table 7 – Over-extractions (acre-feet)

Party	APA	Carryover and/or Stored Water	Maximum Allowable Extraction ¹	Total Rights ²	Amount Pumped	Over-extraction ³	Violation of Judgement?
California, State of ⁴	50.00	No	20.00	-24,278.73	91.61	-24,370.34	Yes
Total:						-24,670.34	

Table 8 – Extractions by Non-Parties

Non-Party	Amount Pumped (acre-feet)
No extractions by non-parties in the 2025-2026 AY.	

¹ Maximum Allowable Extraction: If the Party has carryover or stored water, they have a maximum yearly extraction of 140% of APA +/- leases and not be in violation of the Judgment if they do not have carryover and/or stored water, they are allowed to over-extract 20% of APA +/- leases or 20 af, whichever is greater.

² Total Rights= APA + one-year carryover + leases (In accordance with the maximum allowable extraction provision, stored water is not counted under total rights.)

³ Over-extraction= Total Rights - Amount Pumped

⁴ Includes Caltrans prior years over-extractions from dewatering under the 105 Freeway.

Table 9 – Non-Consumptive Water Use Permits

Entity	WRD Res. No.	Description	2025-2026 Extraction
Boeing Company (Assigned NCWUP by City of Long Beach)	22-1178	Allowed to extract 242 acre-feet of water per year for the period from December 1, 2022 - November 30, 2027	85.83
Boeing Company (Assigned NCWUP by City of Compton)	22-1179	Allowed to extract 145 acre-feet of water per year for the period from July 1, 2022 - June 30, 2027	75.09
Defense Logistics Agency (Assigned NCWUP by City of Norwalk)	24-1228	Allowed to extract 11.50 acre-feet of water per year for the period from February 3, 2024 - February 2, 2029	0.67
Demenno/Kerdoon	22-1180	Allowed to extract 25 acre-feet of water per year for the period from July 1, 2022 - June 30, 2027	3.67
Omega OPOG LLC	23-1202	Allowed to extract 43 acre-feet of water per year for the period from October 1, 2022 - September 30, 2027	7.53
Water Replenishment District (Assigned NCWUP by City of Vernon for perchlorate remediation)	22-1170	Allowed to extract 320 acre-feet of water per year for the period from May 1, 2022 - January 31, 2042	84.55
Total			257.34

Successions of Allowed Pumping Allocations
as of
June 2026

Appendix B – Succession of Allowed Pumping Allocations June 2026 (acre-feet)

ABBOTT, J. P., INC	17.00	TOTAL	0.00
SOLD TO PICO COUNTY WATER DISTRICT	-17.00	AMERICAN PIPE AND CONSTRUCTION CO	150.00
TOTAL	0.00	(NOW KNOWN AS AMERON PIPE PRODUCTS GROUP- SOUTHERN CALIFORNIA DIVISION)	
ABC UNIFIED SCHOOL DISTRICT		TRANSFERRED TO AMERON PIPE PRODUCTS GROUP- SOUTHERN CALIFORNIA DIVISION	-150.00
SUCCESSOR TO ARTESIA SCHOOL DISTRICT	41.00	TOTAL	0.00
SUCCESSOR TO BECK AND THOMASON CONSTRUCTION CO	1.00	AMERICAN TEXTILE MAINTENANCE COMPANY	
SUCCESSOR TO BLOOMFIELD SCHOOL DISTRICT	32.00	SUCCESSOR TO SOUTHERN SERVICE CO AND ENVIRONMENTALS, INC (12/10/2009)	65.00
SUCCESSOR TO CARMENITA SCHOOL DISTRICT	7.00	TOTAL	65.00
SUCCESSOR TO COTTON, HARRY LEE AND DORIS L	4.00	AMERON FABRICATION PRODUCTS	
SUCCESSOR TO KOOLHAAS, SIMON AND SOPHIE GRACE	7.00	SUCCESSOR TO AMERON PIPE PRODUCTS GROUP- SOUTHERN CALIFORNIA DIVISION	150.00
SUCCESSOR TO SUMIDA, KAZUO	2.00	SOLD TO DOMINGUEZ WATER CO	-150.00
SUCCESSOR IN PART TO EXCELSIOR UNION HIGH SCHOOL DISTRICT	163.00	TOTAL	0.00
SUCCESSOR IN PART TO FIKSE, ALFRED JR AND AGGIE	10.00	AMERON, PIPE PRODUCTS GROUP SOUTHERN CALIFORNIA DIVISION	
SUCCESSOR IN PART TO VISSER BROTHERS	10.00	(FORMERLY KNOWN AS AMERICAN PIPE AND CONSTRUCTION CO)	
CONDEMNED AND TRANSFERRED FROM CONTRERAS, R M	6.00	TRANSFERRED FROM AMERICAN PIPE AND CONSTRUCTION CO	150.00
CONDEMNED AND TRANSFERRED FROM JONES, HENRY S AND MADELYNE	1.00	SOLD TO AMERON FABRICATION PRODUCTS	-150.00
CONDEMNED AND TRANSFERRED FROM KAMPEN, FRITZ AND CLARE	11.00	TOTAL	0.00
CONDEMNED AND TRANSFERRED FROM LONG, MELVIN L AND STELLA M	2.00	ANACONDA AMERICAN BRASS CO	
CONDEMNED AND TRANSFERRED FROM RYLAARSDAM, SIMON AND MARY JANE	1.00	(NOW KNOWN AS ARCO METALS CO, AMERICAN BRASS)	
TOTAL	298.00	ANGELES ABBEY MEMORIAL PARK, INC (FORMERLY KNOWN AS MAUSOLEUM PARK, INC AND SUN HOLDING CORP)	
ABEX CORP		TRANSFERRED FROM MAUSOLEUM PARK, INC AND SUN HOLDING CORP	4.00
(FORMERLY KNOWN AS AMERICAN BRAKE SHOE CO)		TOTAL	4.00
TRANSFERRED FROM AMERICAN BRAKE SHOE CO	42.00	ANKER, GERRIT (SEE LISTING UNDER DE VRIES, AGNES)	
SOLD IN PART TO D H INVESTORS	-25.88	AQUA CAPITAL MANAGEMENT LP	
SOLD IN PART TO DOWNEY, CITY OF	-16.12	SUCCESSOR TO NATIONAL OFFSETS, INC.	257.00
TOTAL	0.00	SUCCESSOR TO CONAGRA TRADE GROUP, INC.	358.00
ADAMS, CHARLES E	6.00	SUCCESSOR TO NI INDUSTRIES	138.00
(CORTY VAN DYKE, TENANT)		SUCCESSOR TO FILTROL CORPORATION	456.00
(SEE ADDITIONAL LISTING BELOW FOR ADAMS, CHARLES E)		SUCCESSOR IN PART TO NEWARK GROUP INC.	200.00
COMBINED AND TRANSFERRED TO ADAMS, CHARLES E AND RHODA A	-6.00	SUCCESSOR TO SMITH REX M	24.00
TOTAL	0.00	SUCCESSOR IN PART TO SMURFIT-STONE CONTAINER ENTERPRISES, INC. (6/19/2007)	1,057.00
ADAMS, CHARLES E AND RHODA E	4.00	SUCCESSOR TO SMURFIT-STONE CONTAINER ENTERPRISES, INC. (5/28/2008)	1.00
COMBINED AND TRANSFERRED FROM ADAMS, CHARLES E	6.00	SUCCESSOR IN PART TO NEWARK GROUP INC.	200.00
SOLD TO CONTINENTAL TITLE CO	-10.00	SUCCESSOR IN PART TO UNITED STATES GYPSUM COMPANY	900.00
TOTAL	0.00	SUCCESSOR TO SEVEN-UP/RC BOTTLING COMPANY OF SOUTHERN CALIFORNIA, INC.	
ADAMS, JULES H		(NOW KNOWN AS AMERICAN BOTTLING COMPANY, SUCCESSOR BY MERGER WITH DR. PEPPER BOTTLING COMPANY OF TEXAS) (10-19-2010)	69.00
SUCCESSOR TO PACKERS MUTUAL WATER CO	34.00	SUCCESSOR TO THE NEWARK GROUP, INC. (11-9-2011)	100.00
SOLD TO HAMM, THEO BREWING CO	-34.00	SOLD TO PARK WATER COMPANY (1-9-2014)	-600.00
TOTAL	0.00	SOLD TO LA HABRA HEIGHTS COUNTY WATER DISTRICT (5-1-14)	-50.00
A E REALTORS		SOLD TO LOS ANGELES, CITY OF (12-18-14)	-1,500.00
(SEE A E REALTY PARTNERS)		SOLD TO BELLFLOWER SOMERSET MUTUAL WATER COMPANY (07-01-15)	-100.00
A E REALTY PARTNERS		SOLD TO PUENTE BASIN WATER AGENCY (07-01-15)	-600.00
(FORMERLY A E REALTORS)		SOLD TO MONTEBELLO LAND AND WATER COMPANY (07-01-15)	-100.00
SUCCESSOR IN PART TO KAISER AETNA	7.00	SOLD TO PARK WATER COMPANY (07-01-16)	-120.00
DEDICATED TO CERRITOS, CITY OF	-7.00	SOLD TO LOS ANGELES, CITY OF (07-01-16)	-690.00
TOTAL	0.00	TOTAL	0.00
AGA JANIAN, GEORGE E		ARCHDIOCESE OF LOS ANGELES EDUCATION AND WELFARE CORP	6.00
