EDIBLE GARDENING

Turn part of your ordinary landscape into a lush edible garden. Use your water in a way that will benefit you and your family while creating a sustainable environment that you can be proud of.

This class will share tips on how to analyze and enhance your soil, as well as how to maximize the productivity of your garden through planning, design, composting and localized irrigation. Learn the fundamentals of propagation and pruning while understanding how to identify and address pest issues. It’s easy to select the right "crop" of fruits, herbs and veggies for your needs, all while having fun in the garden!

BOARD OF DIRECTORS

Willard H. Murray, Jr. Division 1
Robert Katherman Division 2
