IRRIGATION BASICS

Learn how to get the most out of your irrigation system so that we can conserve water, live more sustainably, and save money on our water bills while we're at it.

This workshop will familiarize homeowners with the components and the layout of residential irrigation equipment while teaching them about the installation and maintenance of an efficient, well-managed irrigation system. Troubleshooting the most common irrigation problems that occur will also be covered, leaving homeowners ready to tackle maintenance issues that may arise.
